Ginger's Healing Lore

Ginger (Zingiber officinale) has been used for over 5000 years to treat a variety of ailments, including nausea, upset stomach and indigestion. Ginger is believed to increase saliva and other digestive fluids, alleviating indigestion and associated problems such as flatulence.

From India and China to Africa and the Middle East, ginger crosses cultures as one of the world's most widely used and time-honoured herbal remedies. Regarded as an effective carminative (a substance which promotes the elimination of intestinal gas) and intestinal spasmolytic (a substance which relaxes and soothes the intestinal tract), ginger is heralded as one of nature's greatest antidotes for general digestive distress.

INGREDIENTS: Cane sugar, freeze dried ginger powder (3%), maltodextrin, natural mango flavour (1%), anti-caking agent (fatty acid salts of calcium).

GINGER CONTENT: 200mg (per gram, equivalent of fresh ginger)
